

Dear FCC, Once again I find that someone/group is trying to violate my first ammendment right under the United States Constitution. As a subscriber to XM radio I have the right to the traffic and weather services provided by them. The traffic is extremely helpful on my daily commute between Baltimore and DC, the traffic services that they provide are far superior to any FM or AM radio station in the area. I hear that the NAB's petition 04-160 wants to eliminate the traffic and weather service. Has this great country been founded on the principals that when someone or some business has a far better product/service that we will fight to eliminate that product or service? Well just think where we would be today as a country if this were the case. Has the tv broadcasting indusrty tried to stop cable tv from playing movies? No! and why should the NAB try to dictate the services that XM Radio provides to its subscribers?

I respectfully urge the FCC to reject NAB petiton 04-160 and allow XM radio to continue to offer the superior services that are currently in place.

Sincerely,
William Jones Jr.
